

Dylan Jiasen Liu

Irvine, CA | dylanjliu11@gmail.com | dylanliu.net

EDUCATION

University of California, Irvine

B.S. Candidate in Computer Science and Applied Mathematics

GPA: 4.0, Dean's Honors List

Irvine, CA

Expected Graduation 2028

EXPERIENCE

Lecture Assistant, ICS 53

University of California, Irvine

Ongoing

Irvine, CA

- Assisted operating systems lectures for 300+ students and explained core systems concepts
- Helped students debug C programs using GDB and develop stronger systems programming skills
- Supported administration of written examinations and maintained consistent grading standards

Research Intern

University of California, Irvine

Summer 2026

Irvine, CA

- Investigated methods for using large language models (LLMs) to generate and interact with SQL queries
- Conducted literature reviews and contributed to research evaluating LLM-based SQL generation
- Developed scoring criteria for evaluating the correctness and quality of LLM-generated SQL
- Worked with healthcare data models including OMOP and MIMIC

Learning Assistant, ICS 6B

University of California, Irvine

Fall 2025

Irvine, CA

- Assisted Boolean logic and discrete structures lectures for 300+ students
- Led 21 private review sessions covering Boolean logic and related discrete mathematics concepts

PROJECTS

AirPiano | Arduino UNO, Edge AI

Winter 2026

- Built a physical self-playing MIDI keyboard using an Arduino UNO
- Wired and assembled hardware for automated key presses and optimized AI models for edge devices

SpeedStreets | React, Vite, Express, Socket.io, Overpass QL

Winter 2025

- Managed the team's GitHub repository and reviewed pull requests throughout development
- Implemented socket connections with Socket.io and Express and contributed to the React frontend
- Developed RESTful API requests to OpenStreetMap data using Overpass QL

React Arena | React, Vite, Express, Socket.io

Winter 2025

- Built a real-time multiplayer web game using React and Vite
- implemented client-server communication and live game-state synchronization using Express and Socket.io

Chopsticks Solver | React, Minimax, Alpha-Beta Pruning, Memoization

Fall 2024

- Developed an interactive React-based Chopsticks game with an algorithm for selecting strategic moves
- Implemented minimax search, alpha-beta pruning, and memoization to efficiently explore game states

TECHNICAL SKILLS

Languages: Python, Java, C, JavaScript, TypeScript, SQL, HTML/CSS

Frameworks/Libraries: React, Node.js, Express, Socket.io, TensorFlow, Vite

Tools/Technologies: Git, REST APIs, GDB, Arduino
